### Autumn and the Check Book

-(AN EDITORIAL) -This is the time of the year when people think of many

things.
Of a roasting turkey on a Thanksgiving table, of boys and girls getting in the swing of school, of the Christmas holidays, coming fast. Of cotton coming out of the field and money going into the bank. Of cold, and frozen water pipes. Of

taxes.

For the fall brings all of these and many more. There is the brittle, bracing morning where the night was soft before. Leaves turn into splashes of color. There is a log in the fireplace And the drifter stops and thinks of home. There is the Community Chest. There is the matter of \$45,434.

For this is the time of the year when we must think of those things, too.

They go together—the Community Chest and the early lovely part of a winter yet to come. There should be no need for a feeble bit like this. There

should be no necessity of pleading with a group of people to pick up their minute share of a not too heavy load.

The art of giving should be so well learned by now, that a Community Chest program with a nominal quota should

a Community Chest program with a nominal quota should come on schedule. Unfortunately it is not true.

Much manpower, many hours of valuable time, duplication of effort, hammering and harassing, begging and pleading and arguing must by necessity be utilized if those agencies depending upon the Chest are to survive.

It should not be, but it is.

And, to save work, if you are determined not to give,

PARIS, Nov. 8—(P)—An authoritative delegation source said today the United States probably will not back a British plan that would order Israeli forces to wither from newly won positions in northern Palestine.

Britain asked the United Nations security council last Thursday to extend its order for the withdrawal of Israeli and Arab forces in Southern Palestine's Negev Desert to include all of Palestine.

The council's order on the Negev front strikes mainly at the forces of Israel, which have advanced to seize key points along the supply routes to desert settlements.
